The performance data presented represents past performance and is no guarantee of future results. Total returns include reinvestment of dividends and distributions. Current performance may be lower or higher than the performance data presented. Performance data current to the most recent month end is available on the Fund's website at www.mwamlc.com/funds_monthly.php. Investment returns and principal value will fluctuate with market conditions. The value of an investment in the Fund, when redeemed, may be worth more or less than its original purchase cost. Returns for periods less than one year are cumulative. The Fund offers another class, the performance for which will vary due to fees and expenses.

For MWIMX the total expense ratio is 0.77%, and the net expense ratio is 0.66%. Expenses reflect a contractual agreement by the Adviser to reduce its fees and/or absorb certain expenses until July 31, 2011, unless terminated earlier by the Board of Trustees. For more information about fees and expenses, please read the prospectus. Performance would have been lower if fees had not been waived in various periods.

¹ Barclays Capital Intermediate U.S. Government/Credit Index is a subset of the Barclays Capital Gov't/Credit Index including all securities with over 1 year but less than 10 years left until maturity. The Barclays Capital Gov't/Credit Index is an unmanaged index composed of securities from the Barclays Capital US Treasury Index, Barclays Capital US Government Related Index and the Barclays US Corporate Index. The index is not available for direct investment; therefore its performance does not reflect a reduction for fees or expenses incurred in managing a portfolio. The securities in the index may be substantially different from those in the Fund.

Fixed income investments entail interest rate risk, the risk of issuer default, issuer credit risk, and price volatility risk. Funds investing in bonds can lose their value as interest rates rise and an investor can lose principal.

You should consider the investment objectives, risks, charges, and expenses of the Fund carefully before investing. ³ MetWest receives credit quality rating on the underlying securities held by the fund from Moody's, Standard & Poors and Fitch. MetWest created the "Quality Distribution" breakdown by taking the highest rating of the three agencies when two or three of the agencies rate a security. If only one agency rated a security, MetWest will use that rating. This fund's portfolio does not currently contain any unrated securities.

⁴ Quality Distribution UST/AGY % includes mortgage-backed and asset-backed securities that are issued by the U.S. Government and government agencies.

⁵ Holdings ≤ B were purchased at B or better.

⁶ Other represents options, swaps and municipals.
